DETAILED ACTION

Response to Amendment

1. According to the "Amendment" received August 8, 2003, the specification has been amended, claims 6, 7, 12 and 14 have been amended; claims 1-5, 11, 13 and 16-19 have been cancelled and claims 20-27 have been added.

Allowable Subject Matter

2. Claims 6-10, 12, 14-15 and 20-27 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 6, 20 and 24, the prior art does not teach or fairly suggest adjusting the gap between a test object and a vacuum seal apparatus by first using a leveling device comprising air bearings to adjust the height of a test object in a frame wherein a first surface of a test object in an essentially co-planar relationship with the top surface of the support frame, and then using an air bearing to adjust the height of a vacuum seal apparatus in an essentially co-planar relationship with the top surface of the support frame so that the vacuum seal is co-planar with the top surface of the test object.

Claims 7-10, 12, 14 and 15 are allowed by virtue of their dependency on claim 6. Claims 21-23 and 25-27 are allowed by virtue of their dependency on claims 20 and 24 respectively.

The main feature that distinguishes the present invention from the prior art is that, positioning the top surface of the test object co-planer to the top surface of a support frame and positioning the vacuum seal co-planer to the same surface obviates the need for dynamically sensing and adjusting the relative heights of the test object and the vacuum seal.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
